This Course is offered for .45 ASHA CEUs. Introductory level Professional area. (100% Attendance Required).

EVIDENCE-BASED PRACTICE THAT SUPPORT STUDENTS WITH AUTISM

Facilitated by: *Kristine Bretl* – M.Ed., BCBA Autism, Behavior, Technology Supports, Inc.

April 17, 2018

9:00 AM - 3:00 PM

Registration Starts At: **8:30**

Crossroads Bible Church

583 US Highway 45
Norris City, IL 62869

Who Should Attend? This session is designed for SLPs, OTs, Gen. Ed. Teachers, Sp. Ed. Teachers, Parents, Paraprofessionals, Social Workers and Administrators.

What Is It? This workshop will discuss autism characteristics and challenges for school professionals and how to choose and use the evidence based practices that are established, within school settings. These evidence-based strategies that address social communication, behavior, and classroom/academic supports for students with autism will be explored, considered and practiced. The two projects that have identified evidence based strategies for autism spectrum disorder, the *National Standards Project from the National Autism Center* and *National Professional Development Center on Autism Spectrum Disorder* will be used as reference and support. Participants will be considering the best practices from these projects and how they relate to supporting our students with autism within the classroom and school environment.

Financial Disclosure: Kristine Bretl is being paid an honorarium and travel expenses for this presentation.
Non-Financial Disclosure: Kristine Bretl has no relevant nonfinancial relationships.

Outcomes

Participants will learn:

- identify the characteristics that are used to classify autism as described in the DSM-V and the Illinois School code, and identify how these characteristics may provide challenges for students within the school environment.
- recognize and select evidence based strategies that have been categorized as support for social-communication deficits and academic needs within a school setting.
- identify evidence-based strategies that can be matched to function when selecting interventions.
